

# Connecticut Valley School of Woodworking

## Build a Marlborough Table (the “other” Chippendale style) - with Will Neptune

Monday – Saturday, August 4 - 9, 2008

### Tools:

Basic layout tools  
Block plane  
Bench chisels  
compass or dividers  
½ round wood file

### Carving tools:

I suggest you purchase these in advance so you are assured of having the tools you need for class. The number to the left of each tool listed is the stock number for the “Swissmade” brand available from Woodcraft – 10% student discount applies if you purchase from the Manchester Woodcraft store

05A10	#1 skew, dble bevel 8 mm
05D07	#5 straight gouge 20 mm
05M07	#5 fishtail 8 mm
05F03	#8 straight gouge 7 mm
05G05	#9 straight gouge 5 mm
05I10	#11 veiner 10 mm

The school will have a set of these tools available to share (you may have to wait!) should you prefer not to purchase all of the above listed tools.

I am looking forward to a great class!

Bob Van Dyke  
Director  
Connecticut Valley School of Woodworking
